Résumé (+ Use/Advantage):

09/12/98 14:10:04

WO9504517 Make-up compsn. in the form of a water-in-oil or oil-in-water emulsion comprises an acidic anti-acne active dissolved in the aq. phase and a pigment or mixt. of pigments dispersed in the oil phase. Pref. the aq. phase comprising the anti-acne active dissolved there in is an aq./alcoholic soln. of the anti-acne active having a pH of $< pK_a + 1$, where pK_a is the logarithmic acidity constant for the fully protonated anti-acne activity. The compsn. addn. comprises 0.1-10 wt.% of pyrrolidone-based complexing agent, pref. polyvinylpyrrolidone complexing agent. The compsn. comprises 0.1-10 wt.% of the anti-acne active, and a 0.1-25 wt.% of the pigment or mixt. of pigments. The pigment or mixt. of pigments is treated with a material selected from silicones, lecithin, lauroyl, collagen, polyethylene, amino acids and ester oils, pref. silicones. The anti-acne active is selected from salicylic acid, retinoic acid, and its derivs., azelaic acid and its derivs., lactic acid, glycolic acid, pyruvic acid, and/or flavonoids. The compsn. can be used as a foundation to even skin tone and texture and to hide pores, imperfections fine lines etc..
ADVANTAGE - The compsn. has improved colour stability and pigment/anti-acne active compatibility. (Dwg.0/0)

Use / Advantage:

WO9504517 < ADVANTAGE > The compsn. has improved colour stability and pigment/ anti-acne active compatibility. (Dwg.0/0)
